Summer Project Assistant (2 Positions): Job Reference #14006-I. Assist in studies of the ecology of the Hudson River. Duties include considerable fieldwork on boats and along shores of the Hudson River, as well as data entry and collection and processing of samples of zebra mussels and other invertebrates. Must be comfortable working in and around the water and handling heavy sampling equipment; experience with boats and training in limnology and invertebrate zoology also helpful. Desired dates of employment are approximately May 15 for one position and June 1 for the other position to September 15, 2014. On-site housing is available. Position reports to Dr. David L. Strayer.

To apply, send cover letter (INDICATING JOB REFERENCE NUMBER), resume with educational background and relevant course work, and the names, addresses and telephone numbers of three references, to the attention of Human Resources, Cary Institute of Ecosystem Studies, PO Box AB, 2801 Sharon Turnpike, Millbrook, NY 12545, or e-mail to jobs@caryinstitute.org.
